

The Concept of library = Environment.

=

- Thing need to do for comfortable of the library. All the thing library need to put in place for library service as to do with "library environment" - it is the backbone.
- library services is affected without a good library environment.
- Example: The physical, social and technological issues related to library environment.
- The internal and external condition of the library.

Types of library environment =

(1) - Physical Environment :

(i) lighting. - library need light.

Physical Environment In term of :

- (i) $\leftrightarrow$ Ventilation - a library must be ventilated in order to facilitate effective learning.
Example, windows,
- (ii) $\rightarrow$ Lighting - A library must be well lighting - in effective lighting can discourage the user.
- (iii) $\rightarrow$ Floor Layout - must be well Planned.
- (iv) $\rightarrow$ Furniture - The Furniture must be Comfortably for the user. Example Chair with Forms, tables in well Condition. Shelves for the book in good Condition.
- (v) $\rightarrow$ Sitting Position -

2 Social Environment :- Relationship between users and interaction.

3 Psychology Environment :- having the feeling of Satisfaction, Comfortability.

④ Technological Environment :- This as to do with the information communication technology services.

⑤ Aesthetic Environment - As to do with the decoration of the library. How beautiful and attractive it is.

Component of library environment-

- Lighting - ~~to~~ Ba
- Ventilation and temperature.
- Proper air circulation.
- Furniture and sitting arrangement.
- Noise Control.
- Cleanliness and ^{aesthetic} ~~aesthetic~~ appearance.
- Space layout.
- Ict Facilities.
- Safety and Security.
- Accessibility.

"Note"

The Concept of Library Environment
The library is not a building that store book but a dynamic learning environment that support reading, research, collaboration, innovation, and intellectual development. The term library environment is the totality of conditions, facilities, and relationships that influence the way people use and experience the library. A good library environment contribute greatly to the quality of library services, user satisfaction and efficiency of staff performance.

According to Aina 2004 the environment which a library operates in determines the effectiveness of its services and its ability to fulfill its educational objectives. i.e. maintaining a conducive library environment is crucial for promoting learning.

Creative and Knowledge Sharing. library environment is also define as the total atmosphere and physical setting in which library activities, services and interaction occurs, it ~~include~~ include both tangible and intangible

Nwalo 2003 define library environment as the sum total of internal and external condition that influence the operations, users, and staff of the library.

Uzuegbun and macAva 2012 describe library environment as the Polistic setting, that is both physical, social, and digital within which the libraries functions are carried out. In short library environment encompasses.

~~env~~ Everything that makes the library to be functional, comfortable and inviting to the users and the staffs.

Type of library Environment.

It can be classified into the following part based on the aspect of the library experience they influence.

(1) Physical Environment - This include the tangible and visible features of the library. they include lighting, furniture, sitting arrangement, Ventilation, temperature and ~~facilities~~ Spatial arrangement.

Explanation

Friday, Nov 14, 2025.

Library Environment. (Important)

- It Promote institutional image.
- It Support health and Safety.
- It encourage Collaboration.

Factor that could
affect Library Environment.

- Funding
- Maintenance Culture
- User behaviour.
- Technological ~~effect~~ development.
- Climate Allocation
- Power Supply.
- management Policy.

Library building

A library is a physical structure that design and ~~construction~~ constructed for Academic and public use.

Importance of library building

- It increases library building usage.
- It influence institutional purpose.
- Facilitate access to information.
- Promote Comfort and Functional of the library.
- It ensure proper preservation.
- It provide Organized Space for information materials.

Assignment

Relationship between a library building and library Services.

*Note - Cite "authors" for the points.
Where you get the info----

Next Class - Classification of library building and planning and

Design of library buildings and so on.

Note -----

"Component of library environment"

~~(*)~~ ~~Unit~~

These are the basic elements that make up the library ~~of~~ environment. Each component contributes to the comfort, functionality and appeal to the library.

They include the following:

- (1) - lighting - Adequate natural light. ~~and~~ artificial lighting for reading and safety.
- (2) Ventilation & temperature: Proper air circulation to avoid heat and discomfort.
- (3) Furniture and seating arrangement

Comfortable. and well ^{Space} ~~State~~ Function

(4) Noise Control - Sound Proof design and rules to ensure quietness.

(5) Cleanliness and Aesthetics - Regular maintenance and can please appearance.

(6) Space layout - Logical arrangement of Department and Collection

(7) ICT Facilities - Computers, Internet, Scanners, digital access point, they must be available.

(8) Safety and Security - Fire alarm, Emergency exist and Surveillance System.

(a) Accessibility - The library must be Accessible to users, through elevator, Path way for people with disabilities.

Important of a good
library Environment.

★ A Conducive library environment is essentials to the libraries effectiveness,

(1) It Enhances Users Satisfaction:

A Comfortable Clean and quiet Environment with friendly library Staffs will attract Users and keep them engage

(2) It Improves Staff Productivity -

A healthy Environment ^{will} boost the

moral moral and efficiency.

(3) It Promote Learning and Research.

This reduces distractions ^{and} Promote
Collaboration

(4) it encourages Collaboration - It
create spaces for and information
exchange.

(5) It Support Health and Safety:

Proper Ventilation will prevent health
Issues.

(6) it boost Institutional image -

A beautiful and functional library
enhances the reputation of the institu-

tion.

Factors affecting library environment.

- (1) Funding - This determine the quality ~~and~~ of Facilities of maintenance.
- (2) management Policy - This affect Staffing, maintenance and Service delivery.
- (3) maintenance Culture - Poor maintenance leads to destruction of facilities.
- (4) User behaviour - Noise, mis-use of furniture and Vandalism. affect the environment.
- (5) Technological development - This determines Ict Integration.
- (6) Power Supply - This may influence the lighting, air-condition and digital access.

(7) Climate Allocation - Extreme
whether affect temperature Control
and Furniture durability.

28/11/2025

- Relationship between library Services and
library building (with Citation)

Answer

- ① - Physical layout [the Contain. of library]
- ② - flexibility [For multipurpose use]
- ③ - Capacity [Population that can contain]
- ④ - Organisation [well spacious, and organised]

- Infrastructure [E-learning room - Internet]

Classification of library building

to can classify your library buildings.

- According to purpose it is meant for.

Example - ~~Academic~~ Academic library building

- School library building

- Special library building

- Public library building.

- National library building.

Classification based on design of the library.

- Purpose ~~built~~ ^{built} library.

- Converted or adapted library building

-

- Small size library {

- medium size library { Poly, Univ., State

- large library building { Federal, Nati

- National library [Apex library]

Planning and designing of the library building

Point / keywords

Planning → User

(1) Preliminary stage

(1) - Purpose

School, Academic
Public, Children
that is the purpose
You want to build

(2) Knowing your User's

Characteristics,
understanding them,

(3) determine the number of
people or number in that
institution.

(4) Doing it Assessments

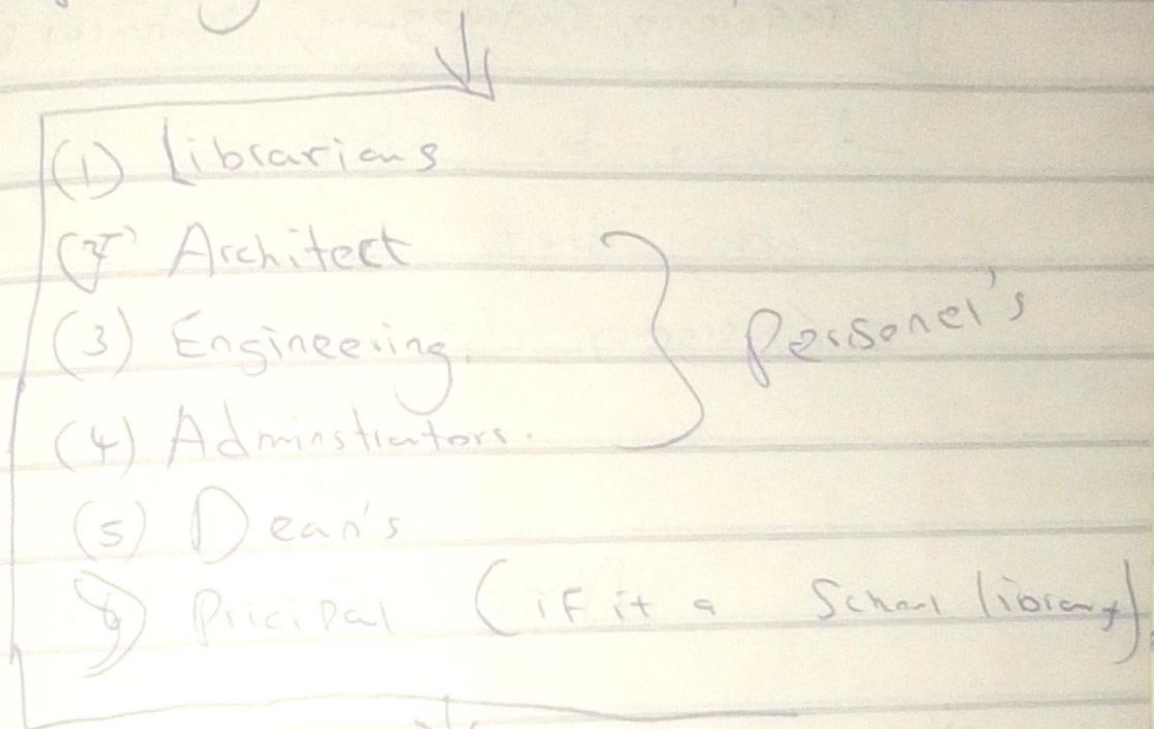

It has to be
assessed.

E-learning,

→ Second Stage

② Planning - Committee formation.

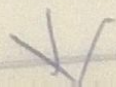

↓ Their Roles

- ↓
- (1) building Programmed
 - (2) monitoring Construction

③ Third Stage

- writing the building Programmed

- ① What Space the library need
- Circulation, readers service, reference, Cataloguing, technical section and
 - distance b/w Shelves
 - Packing Shelves
 - Emergency exist

Note / Explanation

① library building - is a physical structure designed and constructed to house collections of books and other resources and academic or public use.

Importance

A library building's importance is multifaceted, focusing on providing a functional, comfortable and inspiring place that serve the community needs and

(1) it Facilitate access to Information

: A good designed library ensure convenient and rapid ^{access} ~~access~~ to both physical & digital resources, moving from closed access open access where user can easily browse and find materials.

(2) It provides a Comfortable & functional environment : The building must offered a comfortable atmosphere for study and working with adequate space for different activities, like formal classes and informal communication

(3) It serves as a Community hub — modern libraries are more than just books repository, they are community centered that offer a range of services and act as a hub for communication & modern social interaction.

(4) — It promote learning & literacy
: by providing a dedicated & literate
learning place, the encourage
a reading culture and support
the aquisition of knowledge, skills
and literacy.

(5) It reflect Institutional Purpose
— the buildings designed
should represent & ~~librarian~~
libraries mission and aim.

(6) Increase Usage — Improvement to
d the physical library building such
quality of instruction labs,
natural lighting & user workspace
can give positive impact to library
usage.

(7) it ensures proper preservation of
books and proper resources.

⑧ it provides an organised Space for Information materials.
